Panchang - Detailed Analysis

Tithi (Lunar Day)

Tithi is the angle between Sun and Moon divided into 12° segments. There are 30 tithis in a lunar month - 15 in Shukla Paksha (waxing) and 15 in Krishna Paksha (waning). The tithi at birth profoundly influences the native's mental and emotional nature.

Vara (Weekday)

The weekday of birth is ruled by a specific planet whose energy colors the native's personality. Each day carries the resonance of its ruling planet.

Nakshatra (Birth Star)

The Nakshatra at birth is the single most important factor after the Ascendant. It defines the native's innate nature, instincts, and karmic patterns.

Yoga (27 Yogas)

Yoga is calculated by adding the longitudes of Sun and Moon, then dividing by 13°20'. There are 27 Yogas, each with specific effects.

Karana (Half-Tithi)

There are 11 Karanas (7 movable, 4 fixed) that repeat in a cycle. The Karana at birth reveals subtle influences on the native's actions.

KP Astrology System

Introduction to Krishnamurti Paddhati

KP (Krishnamurti Paddhati) is a modern system of astrology developed by K.S. Krishnamurti in the 20th century. It uses stellar subdivisions (Nakshatra and sub-lords) for precise predictions. KP divides each sign into 249 sub-divisions for pinpoint accuracy.

Key Concepts

- 249 Sub-divisions: Each Nakshatra (13°20') is divided into 9 sub-parts ruled by different planets
- Sign Lord: The ruler of the sign in which a planet or cusp falls
- Star Lord: The ruler of the Nakshatra in which it falls
- Sub Lord: The ruler of the sub-division within the Nakshatra
- Cuspal Sub Lord: The most important factor for event prediction
